

PRO

CON

If God doesn't exist, objective moral values and duties do not exist

HUMANISM: Moral Values and duties are the result of evolution. People survive better in groups and values protect groups

Evolution of the fittest is in contradiction - without God anything goes - the selfish gene

How dare you say all atheists are bad people!

The issue is not **BELIEF** in God, but the **EXISTENCE** of God

ATHEISTIC MORAL PLATONISM: Moral Values simply **EXIST**

There is no evidence for Atheistic Moral Platonism, has no scientific basis and is extremely unlikely

Without God Naturalism is true (anything that is natural is good)
